Larger Printing Size

Provide infinite possibilities for industrial designers and makers

Higher Precision

The Z-axis is supported by the combination of dual-linear guide, rod motor and clearance nut which dramatically improves stability while in motion and reduces the risk of layer shifting.

Highly efficient heat dissipation system is adopted to improve printing quality and prolong service life. Reduce maintenance costs, use it free of worry.

More Even Energy Distribution

Equipped with **4K industrial monochrome screen + new matrix light source design + advanced optical algorithm engineering**, Foto 8.9s guarantees the uniformity of screen light intensity distribution and high-precision printing, with max printing speed 50 mm/h, triple that of color LCD printers.

Difference In Energy Distribution

The optical engine system developed by Flashforge, together with the newest masking technology, allows the difference in energy distribution to be less than 10%.

Print Area With Fine Precision

Improved Success Rate

More than 90% of the print by Foto 8.9s is promised in its precision, and success rate is improved by 30%.

Specifications

Print Speed	10-50 mm/H
Build Volume	192*120*200 mm
Layer Height	0.025-0.2 mm (Adjustable)
XY Resolution	0.05 mm
Wavelength	405 nm
Z-axis	Industrial grade dual linear rails
Projection Screen	8.9 Inch 4K industrial grade monochrome
Light Source	New parallel light source + optical masking technology
Build Plate	Matte Plate (More Adhesive)
Vat Capacity	0.5L
Connectivity	USB / Wi-Fi / Ethernet
Rated Power	120W
Printer Dimension	305*264*490mm
Touch Screen	3.5 inch touch screen
